

# PERGRAPHICA® COLOURS PAPER

Precision and finesse for intricate design

Core color	Thickness	
	300g/m <sup>2</sup>	330g/m <sup>2</sup>
Mysterious blue		93099
Noble red		93100
Magnificent green		93101
Infinite black	93102	
Euphoric pink		93103
Sensual brown		93104
Stormy grey		93105

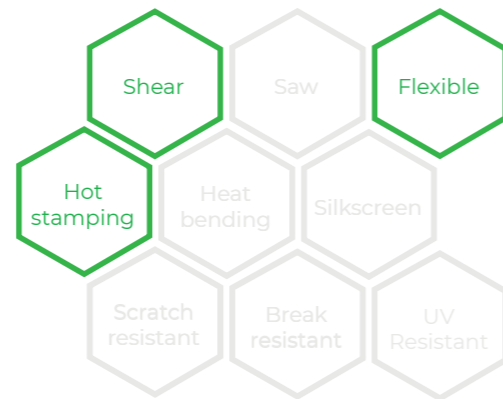

- Combined with laser engraving: this paper highlights ultra-fine engravings, perfect for prototyping or artistic creations.
- This paper is ideal for laser engraving, producing beautifully contrasting colors. The engraved color is lighter than the original color.
- Also perfect for cutting lace patterns or very thin shapes without leaving any burn marks. Dotted cuts are also possible to make folding easier.

# ALULASE PREMIUM

The revolutionary aluminum

Surface color	Core color	Thickness	
		*0.5 mm (0.020")	*1.0 mm (0.040")
silver matte	black	74789	75448

· Alulase Premium delivers a deep, homogeneous black engraving with excellent contrast on a metallic surface.

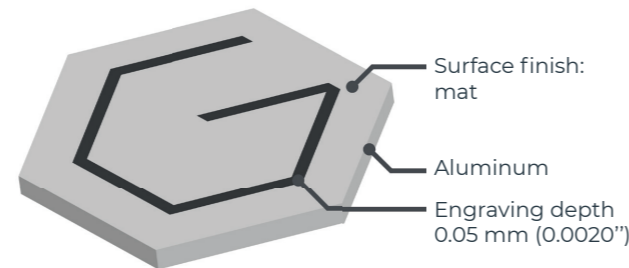

· Designed for CO2 laser engraving, it enables a straightforward workflow with consistent results and easy repeatability, perfect for production environments where speed and reliability matter.

· Alulase Premium is conditionally suitable for outdoor use, depending on the environment. It is suitable for use in dry and humid environments, rural, urban, or slightly industrial or maritime environments.

# MIRROR ACRYLIC

The reflection of your creativity

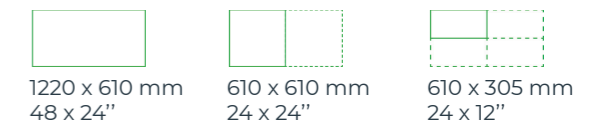

Surface color	Core color	Thickness
silver	clear	*3 mm (1/8")
gold	clear	74451
pink	clear	74452

· Lighter and stronger than glass, mirror acrylic is the perfect alternative for creative signage applications.

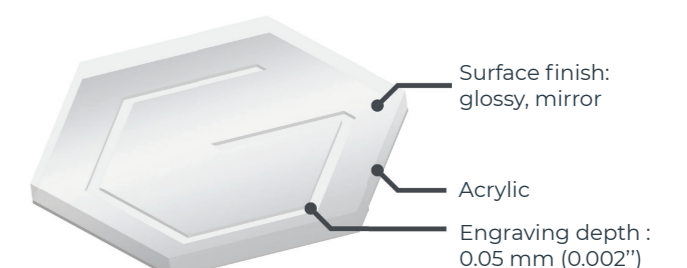

· Engraving possible on both sides: on the back for a transparent reverse engraving or on the top for a standard frosted finish engraving.

· High quality, particularly in terms of cutting, for high-end signage and promotional items.
